EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

2023 – 2027

A.D. Patel Institute of Technology, Anand

CGPA: 7.45 (till 6th Sem)

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Web Technologies.

TECHNICAL SKILLS

Programming Languages	C/C++, JavaScript, Python
Web Development	HTML, CSS, React.js, Next.js, Node.js, Express.js, Tailwind CSS, TypeScript
Databases	MongoDB, PostgreSQL, MySQL, Firebase Firestore
Tools & Technologies	Git, GitHub, RESTful APIs, Postman, JWT Authentication, Socket.io
Cloud & DevOps	Vercel, MongoDB Atlas, Firebase, Razorpay API
AI/ML & Data Science	Pandas, NumPy, Machine Learning Fundamentals
Other Skills	System Design, API Development, Agile Methodologies

WORK EXPERIENCE

Full-Stack Developer Intern

May 2026 – Jun 2026

Mirani Marketing, Surat

- Built **Solmarkt**, a production-ready B2B solar marketplace connecting Customers, EPC Contractors, Vendors, and Installers — fully deployed at [solmarkt.com](#).
- Engineered complete backend architecture using Next.js 16 Server Actions and Firebase Admin SDK, implementing multi-role JWT auth, OTP verification, and password reset via Nodemailer.
- Designed Firestore data models across 11 collections and built a zero-polling real-time notification system triggered across all role interactions with optimized server-side queries.

Node.js Developer Intern

Dec 2025 – Feb 2026

Webito Infotech, Surat

- Built a production-grade backend system using Node.js and Express.js, processing over 500 API requests daily with 99.5% uptime.
- Created and validated 15+ RESTful API endpoints with comprehensive error handling using Postman, reducing debugging time by 30%.
- Optimized query performance by 25% through efficient schema design and collaborated with 5+ senior engineers on CI/CD workflows.

PROJECTS

Solmarkt — B2B Solar Marketplace Platform

May 2026 – Jun 2026

- **Stack:** *Next.js 16, React 19, TypeScript, Firebase Firestore, Tailwind CSS 4, Framer Motion, JWT, bcryptjs, Nodemailer, Zod.*
- Architected backend for a production B2B solar marketplace with 5 user roles (Customer, EPC, Vendor, Installer, Admin) managing the complete solar supply chain from RFQ to project completion.
- Designed Firestore data models across 11 collections and 30+ server actions covering bid management, project milestone tracking, vendor sourcing, and order fulfillment pipelines.
- Implemented Firestore quota fallback system auto-switching to local JSON database — ensuring 100% uptime on free-tier limits; deployed live at [solmarkt.com](#).

Sarthi — Real-Time Ride-Sharing Platform

Nov 2025 – Dec 2025

- **Stack:** *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS, React-Leaflet, GSAP.*
- Architected a full-stack MERN ride-hailing platform with separate secure workflows for Riders and Captains, featuring role-based JWT authentication.
- Engineered bi-directional real-time communication using Socket.io to broadcast live driver location updates, rendering route polylines dynamically on interactive Leaflet maps.
- Leveraged MongoDB 2dsphere indexes for geospatial queries and built a secure OTP-based ride commencement system with dynamic fare calculation across Car, Auto, and Bike.

ACHIEVEMENTS

- **CVMU Hackathon 4.0 (2026)** – Full-Stack Lead, team of 4; built Seva Sathi home service marketplace in 11 days.
- **Amazon ML Workshop, IIT Bombay (Dec 2024)** – Hands-on training in Pandas, NumPy, and ML model building.

CODING PROFILES

- **LeetCode** ([devarshijani](#)): Solved 150+ problems – Arrays, Strings, Recursion, Hashing, Stacks, Queues, Linked Lists, Searching & Sorting.

POSITIONS OF RESPONSIBILITY

- **National Cadet Corps (NCC), India** – Completed CATC and Army Attachment Training at Jamnagar military base; developed discipline, teamwork, and leadership through intensive military-style training.
